Bank/Cash account	5000																		
		Operations 1. Purchase 1 product No entry 2. Receive 1 product ! 3. Supplier invoice ! Price difference 4. Pay supplier 10 5. Sell 1 product No entry 6. Deliver 1 product ! 7. Customer Invoice 20 Cost of Sale ! 8. Customer pays 20																	

Generic Principles

In double-entry accounting, Debit and Credit symbols are used instead of + and – operations.

Debit (Dr) transaction = increase in **assets** or **expenses**

Credit (Cr) transaction = increase in **liabilities** or **gain**

Opposite transactions also used to decrease the values, e.g. a **debit** transaction will *decrease* **liabilities** or **gain**

For each transaction, the total of Dr and Cr must be equal

Reminder table	Dr	Cr
Asset	1	/
Liability	/	1
Expense	1	/
Income / Gain	/	1
Capital	/	1
